

Active Ankle T2 from Active Ankle Systems

The "T2" features a durable, quick-fitting single strap system that is adjustable for both high- and low-top shoes. That, combined with feather-light E.V.A. padding that hugs every contour of the ankle, offers a sleeker, less bulky brace while still offering maximum performance and protection.

Dorsal Night Splint®

The Dorsal Night Splint has been designed to hold the foot in a neutral position during sleep, thereby helping to alleviate the morning pain and discomfort associated with plantar fasciitis, and may also be used for virtually any condition where stabilization of the ankle in a neutral position is desired.

Call SPS Customer Service at 800.767.7776 for additional information on all Active Ankle system products now available at SPS.
