

+PLUSeries 25/60 Adhesives from Fabtech Systems

+PLUSeries™ 25 and 60-second structural urethane adhesives are a versatile and fast two part urethane system used for bonding and repairing plastics, composites, aluminum, steel, plaster and pretty much anything you can think of commonly used in the O&P manufacturing process. Since it's a structural adhesive, it is

exceptionally stronger than brittle, fracture prone acrylics commonly used in our industry today. These urethanes are so strong you can even drill and tap them!
