

SPS CLINICAL SERVICES ON-SITE EDUCATION

Sam Brouillette, CP, CFo, applies his 26 years of experience to educate fellow O&P professionals. Sam travels the country meeting with clinicians and presenting at national meetings on topics ranging from new technology to coding and justification issues.

Elizabeth Hillen, M.Ed., CPO, LPO, has dedicated her passion for helping people to 20+ years of service in the O&P and physical rehabilitation industry. Liz is focused on developing orthotics education tracks and supporting O&P clinicians with prosthetic products and technologies.

Short Courses: 2-Hours

FREEDOM INNOVATIONS – PLIÉ® 3 MPK

2.25
CEUs

Learn proper patient selection, function, features, and justification/reimbursement of Plie3 MPC Knee. Alignment, setup, programming, and advanced settings will also be covered.

BLATCHFORD– ORION3 MPK

2.25
CEUs

Learn proper patient selection, function, features, and justification/reimbursement of Orion3 MPC Knee. Alignment, setup, programming, and advanced settings will also be covered.

BLATCHFORD – LINX INTEGRATED SYSTEM

2.25
CEUs

Overview course of the unique features and benefits of the Linx above knee system. Linx Integrated Above Knee Systems software will also be reviewed.

NABTESCO – ALLUX MPK CERTIFICATION

2.25
CEUs

Learn about patient selection, features, and functions. ALLUX Software UI and programming will be covered. Following successful completion of the course and fitting, certification and license to purchase an ALLUX MPK and dongle is possible.

MICROPROCESSOR-CONTROLLED FOOT ANKLE CONSIDERATIONS

2.25
CEUs

This course will provide a review of the unique features and functions, clinical relevance, medical justification, and programming software of mechanical and hydraulic microprocessor-controlled feet.

ADVANCED LOWER EXTREMITY ORTHOTIC SOLUTIONS AND OUTCOMES (LECTURE ONLY)

2.25
CEUs

Review unique designs and material sciences behind dynamic AFOs and KAFOs, stance control solutions, innovative bar and joint options, and WalkAide/FES protocols for improved gait biomechanics.

TRANSFEMORAL GAIT

2.25
CEUs

Review existing gait issues and how these relate to issues with optimizing Mechanical and Microprocessor knee systems. Learn to build relationships with and educate rehabilitation professionals.

Half-Day Courses: 4-Hours

ADVANCED LOWER EXTREMITY ORTHOTIC SOLUTIONS OUTCOMES

4.0
CEUs

This course includes a lecture as well as the opportunity to gain hands-on training with pertinent casting, alignment techniques and protocols, stance control trial tools, and FES technology programming,

PROSTHETIC FOOT CONSIDERATIONS

4.25
CEUs

Review select K2-K3 feet and discuss how to properly select, code, and medically justify different prosthetic feet. Briefly review functional levels and Medicare LCD.

ELEVATED VACUUM

4.25
CEUs

Learn benefits and patient criteria of Elevated Vacuum technology. Review WillowWood LimbLogic, LL Communicator Software, WillowWood One System, Blatchford EchelonVAC, and other products. Meets certification requirements for One TF System.

MECHANICAL PROSTHETIC KNEE CONSIDERATIONS

4.25
CEUs

Review K1-K4 mechanical knees and how to properly code and medically justify associated L-Codes. Briefly review functional levels and Medicare LCD.

OUTCOME MEASURES: SUPPORTING YOUR CLINICAL EXPERTISE

4.25
CEUs

Review several outcome measures and how they support documentation and function classification requirements of Medicare and 3rd party payers. Course includes education on The Modus Trex and Europa utilization monitoring devices and the Veteran Administration's involvement in these two devices.
