Choosing where items will ship from

Pro Tip: You have control over where your items ship from. Try to ship as many items from the same distribution center or supplier for fewer packages and additional savings.

- Items will automatically ship from your default distribution center (dc), **if available**.
- If there is no availability in your default DC, you'll see the **red message** (shown below) stating it's not available to ship from there. At this point, select a another DC or ship from supplier.
- If there is no in-stock availability for an item, it will automatically ship from the supplier.
